

# CAPITAL PLASTIC COIN HOLDERS

All CAPITAL holders are for the protection and display of your possessions. You are justly proud of your property and you will be more than delighted when you see them housed in CAPITAL holders. They are economical too, providing a most luxurious setting at the lowest cost consistent with highest quality.

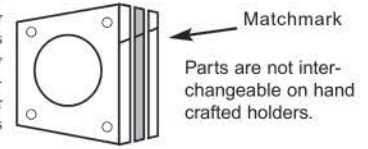

## CAPITAL PLEXIGLAS HOLDERS:

**First Class:** These are first class, hand-crafted holders for the discriminating collector who desires the best environment for his possessions. They are made from inert plexiglas acrylic plastic that will never fade or discolor. They do not contain any sulfur, acid, polyvinyl chloride (PVC), foam rubber or oily substances. The coin holders are made of three panels of Plexiglas, a colored center panel called the "insert" that contains the tapered coin openings and the printing and two clear panels for the front and back called "windows" that protect the coins and permit their examination from the obverse and reverse. The panels of the Plexiglas holders are held securely together by a network of clear plastic screws and posts.

**Coin Openings:** The coin openings are tapered and carefully sized to insure the accurate fit of most coins. Be sure you are putting the right coin in the proper opening from the front side of the holder. Gently press the coin into the opening so the coin seats in the tapered sides of the hole. All coins vary in size somewhat due to machine tolerances during the minting process. Generally, the older the coin the greater the differences in minting tolerances. Pre-1900 American coins, Foreign coins and Morgan Dollars tend to vary greatly in size.

**Assembly:** All hand-crafted, Plexiglas holders are match-marked at the edge of the holder for ease of reassembly. When assembling the holder, find the craftsman's match mark which is usually on the edge of the upper right hand side of the holder. Arrange the marks to form a straight line. The edge should then look like the illustration. Please read the instructions that are enclosed with the holder.

**Printing and Catalog Numbers:** All holders numbered in the 400 and BVD series are fully imprinted with Titles, Dates, Mint Marks and any other appropriate descriptions. The BVD stands for Bank Vault Drawer. Holders in the BVD series are just the right size (8x14) to fit into your safety deposit boxes. They are designed to hold complete sets or as many coins in a set as aesthetically possible. Our 8x10 holders are short BVD's and will fit in safety deposit boxes also. **Safe:** When Capital's Plexiglas holders are assembled and bolted closed your property is encased in a rigid plastic vault that will not easily shatter, bend or pop open when accidentally dropped or mishandled. This safety feature is not found on any other kind of holder. By design, Capital's Plexiglas holders are an intelligent blend of beauty and function. Other standard and special Capital Plastic Holders are available...please inquire!
