

AIR-TITE COIN HOLDERS

AIR-TITE HOLDERS THE COMPLETE COIN PROTECTION & DISPLAY SYSTEM

For years, coin collectors have been searching for fail-safe protection for their precious investments. After years of research, a product is now available which meets the requirements of the most demanding and conscientious collector, offering confident protection, total visibility, optimal display, efficient space-saving storage, and reusability.

The AIR-TITE Coin Holder - a clear plastic case with an inner seal - provides total protection for your coin: Keeps it air-tight, moisture-free, and tarnish-free. Further, it allows obverse/reverse viewing, as well as reusability. This plastic holder contains no PVCs; it will not yellow or become brittle, and is highly scratch-resistant. The inner seal is of neoprene, and has been extensively tested to ensure its inert quality.

As illustrated at left, the holder consists of two Lucite plastic cases (top and bottom) and a special ring-shaped seal. When the cases are snapped firmly together, the seal (which securely frames the encased coin) presses against the plastic enclosure resulting in an absolute air-tight holder.

In order to properly frame and secure the coin, the seal opening must precisely fit the coin. This custom fit is accomplished by manufacturing the seals with openings to fit coins ranging in diameter from 10 through 42 millimeters.

The entire product line has been divided into four basic group sizes, referred to as Models (A,T,H,I). The following illustration shows the various AIR-TITE products, their usage, and the relative sizes of the four models.

HOLDER MODEL	MM SIZING	INSIDE DIA.	OUTSIDE DIA.	DEPTH
A	.13mm - 19mm	1.018	1.218	.062
T	.20mm - 25mm	1.237	1.437	.080

HOLDER MODEL	MM SIZING	INSIDE DIA.	OUTSIDE DIA.	DEPTH
H	.26mm - 32mm	1.550	1.750	.125
I	.33mm - 40.6mm	1.818	2.031	.115
